Page-by-page guides

Each guide follows: Purpose → When to use it → How to get there → What you can do → Related pages.

Every route is also listed in the [complete page index](#).

Admin

Page	What it covers
Settings	Settings — appearance and local shell preferences.
Teams	Teams — Admin surface.

Audit

Page	What it covers
Activity	Activity — Audit surface.

Explore

Page	What it covers
Discovery	Discovery — Explore surface.
Federated	Federated — Explore surface.
Graph	Graph — Explore surface.

Primary

Page	What it covers
Catalog	Catalog — Primary surface.
Cluster	Cluster — Primary surface.
Health	Health — Primary surface.
Overview	Overview — Primary surface.
Mission Control	Mission Control — live departures board across namespaces and workspaces.
Spaces	Spaces — Primary surface.

Support

Page	What it covers
Help	Help — Support surface.

13 guides. Regenerate: `node scripts/customer-docs/generate-guide-index.mjs` .

Settings

Purpose

Settings — appearance and local shell preferences.

When to use it

- Open this surface when the job matches the purpose above
- Start from the product home / dashboard if you are unsure where to begin
- Confirm auth and that required backends/operators are reachable if data looks empty

How to get there

- Route / id: `/settings`
- Nav: **Admin** → **Settings** (sidebar, command palette, or desktop nav)

What you can do

1. Open `/settings` and wait for live data from Hermes.
2. Use filters and search when the page provides them.
3. Drill into a row or card for detail, then jump to related surfaces.
4. For mutating actions: review impact, role gates, and confirmation dialogs first.

If the page stays empty, check service health, auth configuration, and that dependencies for this domain are installed.

-

Teams

Purpose

Teams — Admin surface.

When to use it

- Open this surface when the job matches the purpose above
- Start from the product home / dashboard if you are unsure where to begin
- Confirm auth and that required backends/operators are reachable if data looks empty

How to get there

- Route / id: `/teams`
- Nav: **Admin** → **Teams** (sidebar, command palette, or desktop nav)

What you can do

1. Open `/teams` and wait for live data from Hermes.
2. Use filters and search when the page provides them.
3. Drill into a row or card for detail, then jump to related surfaces.
4. For mutating actions: review impact, role gates, and confirmation dialogs first.

If the page stays empty, check service health, auth configuration, and that dependencies for this domain are installed.
